SERVICE **23**

OUR PARTNERS **24**

Our Presence

At Daly Middle East, our specialization lies in providing top-tier equipment and comprehensive services across the Lighting, Instrumentation, Water Treatment, and UV sectors sectors throughout the GCC with offices and partners within each country.

Our dedicated team of seasoned engineers possess extensive experience in working with these products, ensuring a deep understanding of both their technical intricacies and the specific environmental demands they face in this region.

Situated strategically within both the Dubai South Free zone & Main Land our locations grants us seamless access to distribution networks throughout the region. This prime positioning enables us to deliver swift, efficient, and cost-effective services, all geared toward delivering maximum value to our valued customers.

We take pride in being a trusted partner, dedicated to helping businesses thrive in their respective industries by providing reliable, state-of-the-art solutions and unwavering customer support. Your success is our ultimate goal, and we wish to exceed your expectations.

Our focus is on delivering specialist solutions that:

- Fully meet the technical specifications of our clients' needs
- Are robust and built to last for longevity
- Locally supported
- Offer value for money
- Meet the required safety and regulations for the specific environments
- Are tried and tested products that we know will meet the high expectations required of them
- Leverage the expertise of our seasoned engineers with years of industry experience
- Prioritize client satisfaction by delivering top-tier products and unwavering customer support

Lighting

Overview

At Daly Middle East we provide specialist Hazardous area equipment where the potential for fire or explosion exists because of the specific location and surrounding atmosphere.

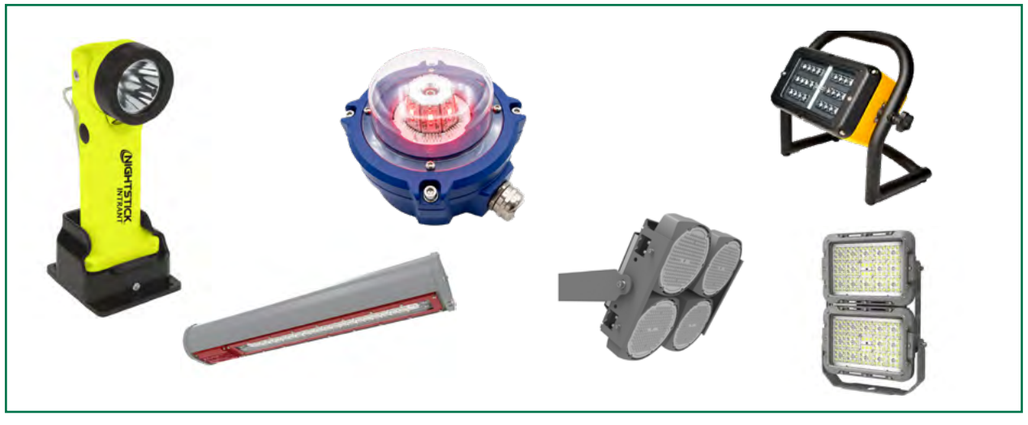

All our products comply with the stringent IEC, ATEX or UL standards for explosive atmospheres caused by gases, flammable fibres, filings and dust particles and have temperature ratings suitable for the hot and humid Middle East environment.

Daly Middle East work exclusively with partners that represent the best in class technologies in their sector. This means working with high quality manufacturers where we can be sure the solution we offer is going to represent long term value for money.

The high level of quality supported by long term guarantees ensures you have the most relevant and qualified product for your exact requirement.

Focus Crane Lighting

Crane booms are notoriously hard on lighting fixtures. The high levels of vibration and range of motion make selecting a fixture difficult. In partnership with Red Sky Lighting, DME developed an LED Floodlight with a fully damped pivoting bracket to ensure the light is always placed on the load, no matter the angle of the boom. Combined with an LED fixtures natural vibration resistance this solution is ideal for the harshest of lighting environments.

hardy Lighting

Specialists in:

Safe Area Aviation Lighting

Overview

Hardy Lighting is a privately owned European company, specialised in niche lighting products with an expertise on aviation lights. With over 20 years of aviation experience by its owners, the company was founded to make products as per regulations worldwide and to become a leading manufacturer in this market. Our mission is to guide our customers through the labyrinth of regulations and applications to supply light to places where visbilty is a challenge

Products:

- Lighted & Unlighted Windsock
- Obstruction Light
- Perimeter Light
- Flush Mount Perimeter
- Flood Light

Applications:

Helideck, Helipad, Crane, High Rise Structure

From: UAE

Specialists in:

Hazardous Area and Industrial LED Lighting

Overview

Red Sky Lighting is a California-based lighting manufacturer that provides reliable lighting products and solutions for industrial applications. Assembled in the USA, our premium harsh and hazardous LED lighting fixtures are ideal for the challenging environments encountered in industries such as marine transport, oil and gas, metal processing, wastewater treatment, and more. Their winning products are backed up by speedy delivery and exceptional customer support. With years of proven service, Red Sky Lighting has earned the trust of customers worldwide.

Products:

Linears, Bay Lights, Floods, Emergency, Retrofit, Hazardous and Industrial Locations

Applications:

Oil and Gas, F&B, Petrochemical, Pharmaceutical, Mining, Aviation, Marine, Ports, Power, Rail and Agriculture

From: USA

Specialists in:

Lighting, Ventilation, Heating & Power

Overview

SA Equip have been in business since 1924 developing safe and rugged practical equipment for use in dangerous and extreme conditions for all kinds of industries all over the world. Their range consists of Heat, Light, Air and Power solutions for use in many heavy industry applications that require portable ATEX equipment for use in hazardous areas, confined spaces and offshore (Zone 1 and Zone 2). With their equipment, you can operate where it would otherwise be impossible whilst also achieving better results with less risk and in fewer man-hours.

Products:

ATEX Portable Lights, Ventilation, Power Distribution, Blowers, Filtration Unit, Heating Jacket, Transformer, EX Air Conditioner and EX Dehumidifier

Applications:

Oil & Gas, Petrochemical, Aviation, Mining, Marine, Ports, Power, Rail, Utilities, Pharmaceuticals, Shipping, Defence

From: UK

Specialists in:

Portable Personal Safety Lighting

Overview

Designed and manufactured by Bayco Products Inc, Nightstick is an international brand of professional lighting products. Their range include flashlights, headlamps and intrinsically safe lighting solutions. Nightstick were founded with the expectation to exceed Industry standards when it comes to performance, quality, user-safety and value for money. Their unwavering commitment to ensuring these qualities are integral within their products, and are clear in their design and build. Nightstick products exceed the lumen ratings of most that of their competitors and all have performance enhancing characteristics – candela, beam distance and run times. All Nightstick products use CREE® LEDs, the #1 manufacturer in the world.

Products:

Headtorches, Headlamps, Torches,

Applications:

Oil & Gas, Petrochemical, Pharmaceutical, Food Industry, Chemical, Marine, Aerospace, Utilities, Shipping, Defence, Civil Defense, Police, Fire Security

From: USA

Specialists in:

LED Tube Lighting & Solar powered Street Lighting

Overview

We can supply LED retrofit bulbs, LED retrofit kits, LED lighting fixtures, solar LED street lights, serving Commercial and Industrial lighting market. The product range includes 2ft 9W LED tube, 4ft 22W LED tube and 5th Generation Emegency LED tube light. All of products have undergone rigorous development,strict QC progress and aging testing before shipping out from our factory, most of our LED products come with UL/ ETL and DLC for rebate projects. The products all come with favorable warranty service against products failures.

Products:

LED Tube Lights & Solar powered Street Light

Applications:

Construction, Electrical, Manufacturing, Oil and Gas, F&B, Petrochemical, Pharmaceutical, Mining, Aviation, Marine, Ports, Power, Rail and Agriculture, Streets, Car Parks

From: CHINA

Specialists in:

Aviation Lighting

Overview

LUXSOLAR is the leading Italian manufacturer of LED Aircraft Warning Lights, founded in 2005 by C&E Group Srl. With over 35 years of expertise in the oil & gas and industrial sectors, the company offers a complete range of obstruction lighting solutions from low to high intensity, certified to ISO 9001, ATEX, IECEx, and ENAC standards. All products are designed and manufactured in Italy

Products:

Aircraft warning lights, Marine Aids to Navigation (NavAids), Helideck lightings

Applications:

Oil & Gas, Aviation, Helideck & Helipads, Shipping

From: ITALY

Specialists in:

LED Street Lighting

Overview

MS LUX, one of Europe's leading manufacturers of professional lighting. We use state-of-the-art LED technology to emulate sunlight, and we adapt and optimise it for all applications with the lowest environmental footprint.

Products:

LED Street Lights

Applications:

Street Lighting, Roads, Outdoor car parks, Parks

From: Croatia

Specialists in:

LED Industrial Lighting

Overview

QVIS Lighting & Security, journey began with a clear vision: to deliver high-quality, innovative solutions in lighting and security — backed by a commitment to customer service that goes beyond expectations. They pride themselves on offering intelligent, energy-efficient lighting and robust, cyber-secure surveillance systems all designed to meet the needs of modern environments..

Products:

LED Industrial, Modular, Surface & Suspended, Downlight & Emergency Light

Applications:

Construction, Electrical, Manufacturing, Oil and Gas, F&B, Petrochemical, Pharmaceutical, Mining, Aviation, Marine, Ports, Power, Rail and Agriculture, Streets, Car Parks

From: UK

Specialists in:

Explosion Proof Lighting

Overview

Over the past few years DATA LINK has been committed to developing and producing professional LED lighting, production technologies, software solutions, and measuring devices which lead to the creation of new technologies and patents in the production of LED lighting. Following global trends and the need for energy-efficient, environmentally friendly, high-quality and long-term sustainable solutions, we have decided to develop and produce technologically advanced LED luminaires.

Products:

Explosion Proof Lighting

Applications:

Oil and Gas, F&B, Petrochemical, Pharmaceutical, Mining, Aviation, Marine, Ports, Power, Rail and Agriculture

From: CROATIA

TRIME
Lighting Towers

Specialists in:

Tower Lights, Security Towers & Power Generators

Overview:

TRIME S.r.l. is a leading Italian manufacturer specializing in mobile lighting towers and temporary power solutions. Headquartered in Cassinetta di Lugagnano (Milan), the company operates a vertically integrated 33,000-square-meter facility where it manages everything from initial equipment design and metalwork to assembly and final testing.Operating heavily in the construction, rental, mining, and event sectors, Trime is a pioneer in sustainable site operations. Through its T-ZERO product line, the company manufactures eco-conscious LED light towers and power generators powered by advanced hybrid, battery, solar, and plug-in technologies. Trime's broader catalog also includes fuel tanks, dust suppression cannons, and mobile wash bays.

Products:

Portable Tower Lights

Applications:

Oil & Gas, Offshore, Onshore

From: ITALY

Ex-tech
Signalling

Specialists in:

Signaling Devices

Overview

Founded in 2012 in the Charente region of France, Ex-tech Signalling began the next phase of its exciting story in May 2023, with acquisition by Pioneer Safety Group (PSG), part of the London headquartered Longacre Group. Ex-tech Signalling was acquired along with Ex-tech Solution, joining the established brands and companies of Pyropress and Pyroban in PSG.

Products:

Visual Beacon Lights, Sounders, Status Lights, Manual Call points, Junction boxes

Applications:

Construction, Electrical, Manufacturing, Marine and Offshore, Mining, O&G, Petrochemical and Warehousing

From: UK

Instrumentation

Overview

At Daly Middle East we have a vast range of Instrumentation and control devices from simple valves through to complex analysis instruments. Daly Middle East's wide range of engineering capabilities enable us to provide solutions for measurement and process applications (flow, pressure, level, temperature, pH), including centralised or remote monitoring via integrated data logging and transmission systems.

Should you require the options for service and commissioning for our products – either onshore or offshore, then our fully qualified service team (based in Dubai) are on hand to assist you.

High Technology - Hazardous Area

DME's range of instrumentation is extremely flexible, from ATEX field instruments through to hygienic tri-clamp fittings. Almost every unit offered can be customized to the exact specification required by the client.

Hastelloy C electrodes, for example, are commonly specified in flow metering, In temperature - custom thermowells milled from solid bar stock with extensive testing & certification options are available.

Finally, we also have a range of signal processing modules that can be used to isolate, boost, convert and control the signals being generated so that we can provide seamless integration with your existing system or adapt your existing instruments to the next generation of control and logging devices.

Ultrasonic level

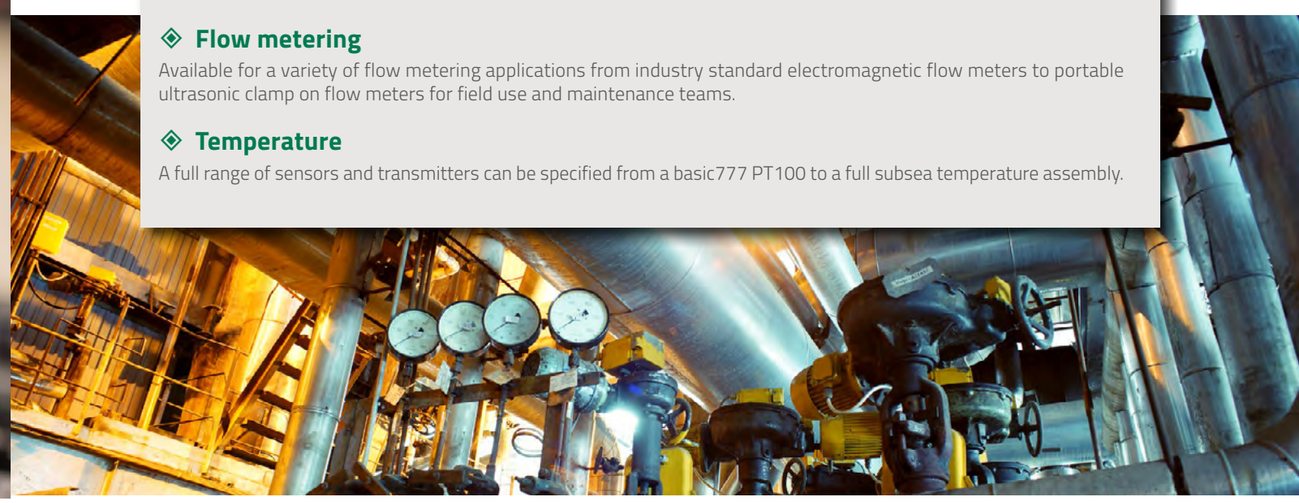

A non contact level measurement technology which is commonly used in wastewater treatment due to its H2S resistance and is available in ATEX versions.

Flow metering

Available for a variety of flow metering applications from industry standard electromagnetic flow meters to portable ultrasonic clamp on flow meters for field use and maintenance teams.

Temperature

A full range of sensors and transmitters can be specified from a basic777 PT100 to a full subsea temperature assembly.

Specialists in:

Level Measurement

Overview:

Trimod Besta manufactures a variety of electric, pneumatic and explosion-proof level switches. Their modular design is a unique deviation from conventional level switch construction with the option of a complete program of plastic and stainless steel for both heavy and light duty uses. The modular system allows individual and numerous combinations of float, flange and switch modules, custom-made and NACE compliant. Owed to an extensive experience in offshore, marine, chemical & petrochemical industries. Trimod Besta has developed many important features designed to solve application problems which may require high pressure, high temperature and corrosion resistant components.

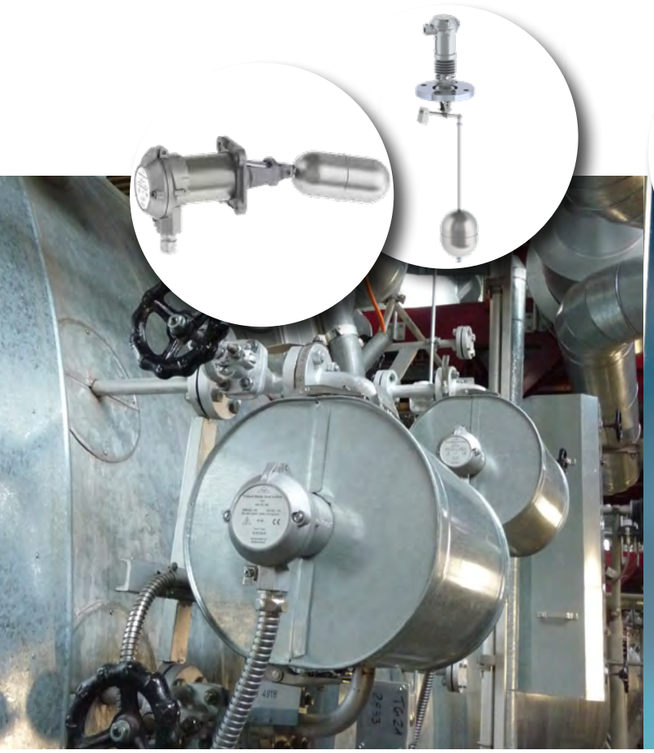

Products:

Switches: Float / Level / Vertical, Level Sensors / Indicators, Pneumatic Controllers, Compressed Air Systems, Electrical Distribution Systems

Applications:

Oil & Gas,Offshore, Marine, Chemical, Petrochemical, Heater Plants, Shipbuilding

From: SWITZERLAND

Specialists in:

Precision Level Measurement Technology

Overview:

For over 80 years, WEKA AG has been a leading Swiss manufacturer of high-precision level measurement solutions for fluids. We offer both standardized and tailor-made level measurement technology based on the magnetic float principle, ensuring accuracy, reliability, and durability in demanding environments. Our expertise lies in developing innovative solutions that meet the highest industry standards.

Products:

Level Measurement: Bypass Visual Level Indicators, Top-of-Tank Visual Level Indicators, Tank Level Indicators.
Customized Solutions: Engineered measurement systems for specialized applications

Applications:

Oil & Gas, Chemical, Pharmaceutical, Industrial & Marine, Energy, Aerospace, and Research

From: SWITZERLAND

Specialists in:

Flow and Level Instrumentation

Overview:

Pulsar Measurement designs, manufactures and supplies non-contacting ultrasonic level, open channel flow and pump instrumentation. The Pulsar Ultra range consists of level control indicators and flow measurement for volume calculation, pump control for both solids and liquids. Blackboxes have data logging capacities for monitoring site level changes, overflows and CSO events. Pulsar offers non-invasive point level detection products for liquids and solids for bulk storage of food, beverage, chemical and pharmaceutical products. Pulsar flow ultrasonic Doppler flow sensors and switches are ideal where non-invasive flow metering is necessary. Pulsar products feature process protection and warn of process changes for the oil & gas industry, reducing the risk of damage to equipment.

Products:

Ultrasonic Level Measurement, Tank Level Measurement, RADAR Level measurement, Pump Control & Data Logging

Applications:

Water Industry Applications, Solids Level Measurement & Control, Liquid Level Measurement & Control, Process Protection, Sand-In-Oil Monitoring.

From: UK

Specialists in:

Sea Water Reverse Osmosis

Overview:

Daly Reverse Osmosis units are custom built to suit the requirements of the individual offshore ship or rig. Specialising in engineering the systems to maximum efficiency with a small footprint, Daly Middle East provides Watermakers with high volume and high quality output. The units may be engineered for specific locations in the world, taking into account local salinity and temperature conditions, with the membranes being selected accordingly. The Daly RO45 and Daly RO82 are the standard units described in this document. They are optimally sized for an offshore rig and deliver 45m3 - 82m3 fresh water/day (283bbl/day - 515bbl/day) from Arabian Gulf (salinity up to 42,000ppm) seawater

Products:

RO45 (45m3) and RO82 (82m3)

Applications:

Offshore and Onshore Rigs, Accommodation Barges, Industrial Process

From: UAE

Specialists in:

Data Logging

Overview:

Signatrol is a UK based company dealing exclusively with data logging equipment that measures temperature, relative humidity, pressure, level, flow as well as common process signals like 4-20mA and DC Voltage. Signatrol offers a wide variety of compact, battery powered devices used for monitoring sensitive goods in storage or transportation.

The high performance data loggers are used in industrial applications to improve processes and ensure high quality standards. Signatrol data loggers record vast amounts of information that can be easily processed with a universal software platform.

Products:

Temperature Data Loggers, Relative Humidity Data Loggers, Pressure Data Loggers, Process Input Data Loggers, Flow Data Loggers & Pulse Input Data Loggers

Applications:

4-20mA Current Logging, Monitoring Vaccine in Storage, Monitoring of Blood Products, Food Safety, Air Quality

From: UK

Specialists in:

Temperature Measurement

Overview:

H&B Sensors specialise in the manufacture of a wide range of industry-leading high temperature, cryogenic and hazardous area measurement instrumentation. H&B's core product range include thermowells, thermocouples, platinum resistance thermometers, bi-metal thermometers, platinum detectors, temperature transmitters, level float switches and miniature heaters. Since 1978, their high quality and precision engineered products have been reliable, efficient and environmentally sustainable. The majority of H&B products are bespoke and manufactured to our customer's specific requirements, providing detailed insights to make the right decisions.

Products:

Temperature Probes, Thermowells, Miniature Heaters, Pressure Transmitters, Signal Conditioning, Calibration Services

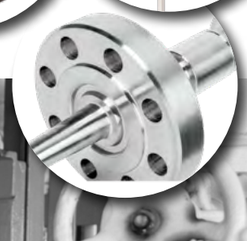

Applications:

Dairy, Energy Management, Petrochemical/Oil & Gas, Food & Beverage, Pharmaceuticals, Aerospace

From: UK

Specialists in:

Water & Gas Leak Detection

Overview:

Sewerin supply tools for water leak location and detection. Sewerin leak location equipment is suitable for water and gas utilities, plumbers and restoration companies.

Sewerin's expertise is the development and manufacture of measuring instruments for locating, measuring and warning of water and gas leaks.

Sewerin's advanced product technology combined with over 100 years of experience in the development of water and gas leak detection and pipe location equipment. Our instruments are designed to find water and gas leaks, locate pipes or lost valves in the following applications:

Products:

Leak Detection, Leak Location, Trunk Main Leak Location Leak Listening, Pipe Location, Flow Measurement & Data Logging

Applications:

Commercial Metering, Leakage Monitoring, Distribution System Monitoring

From: GERMANY

Specialists in:

Temperature Measurement

Overview:

Status Instruments manufactures a range of pioneering electronic devices for the Process Control Industry. Coupled with advanced applications and customised features Status has become one of Europe's leading suppliers of thermal technology.

Status Instruments has developed an extensive range of digital temperature transmitters which can be programmed to measure the required temperature range either by push button or PC, along with a wide range of Pt100, thermocouple sensors and signal conditioners. The company's confidence in the products' adaptability and durability is matched by an unprecedented 10 year warranty on the majority of their product range.

Products:

In-head Temperature Transmitters, Battery Powered Thermometers, Isolators, Converters and Splitters, DIN Rail Transmitters / Power Supplies, Programmable Signal Conditioners, Temperature Sensors

Applications:

Process Control Industry, Oil & Gas, Chemical, Pharmaceutical

From: UK

UV and Water Treatment

Overview

Daly Middle East can specify, supply and support a variety of disinfection technologies. We work with word class brands who have international presence through a broad range of market sectors and have supplied thousands of systems worldwide.

UV treatment is a physical, non-intrusive method that reduces the total number of organisms in the environment without the use of chemicals. This avoids an increase in the toxicity of water and reduces the build up of harmful substances in air ventilation systems, thereby helping to maintain the natural and sensitive balance of ecosystems worldwide. The presence of bacteria and viruses are problematic in all water systems, from ultra pure water loops through to wastewater treatment. But all micro-organisms are rendered non-viable by a correct dose of UV and Ozone; our principles maintain comprehensive databases of organisms and the dosage of UV required to achieve 1, 2, 3 or higher log removals.

Ozone

Final disinfection in bottled water factories is usually performed with Ozonation, however if your source water contains the requisite ingredients, too much Ozone can lead to the production of Bromate. DME overcame this challenge at a bottling plant by providing a solution which could very accurately control the level of ozonation in the water ensuring continuous production of safe drinking water.

Return on Investment (UV / Ozone)

Daly Middle East's disinfection solutions fall broadly into two applications.

The first of these is water treatment and is used in many industries from large wastewater treatment plants requiring hundreds of kilos of Ozone per hour to ultrapure water loops requiring just 3g/hr. The goal in all of these processes however is to optimize the use of Ozone & UV to achieve the required water quality with the minimum total lifetime expenditure.

The second category is air disinfection using UV. Typically, the goal for these systems is to reduce both operating costs and odours being drawn through the ventilation system. In specifying the system correctly operating costs are cut by reducing the requirement to have the vents cleaned several times per year..

UV Disinfection

A non-chemical disinfection technology that is used extensively here in the Middle East and is available for both Water or Air applications.

Ozone

A very powerful oxidising agent, it is highly effective in breaking down CODs and in the disinfection of water.

ATLANTIC ULTRAVIOLET CORPORATION® SINCE 1963

Specialists in:

Ultraviolet Disinfection for Air & Water

Overview

Atlantic Ultraviolet Corporation has pioneered the discovery and development of beneficial uses of ultraviolet energy and has been the foremost manufacturer for nearly 50 years. Atlantic provides a range of ultraviolet water purification equipment, ultraviolet air sanitizing and surface disinfection systems and UV germicidal lamps. Atlantic's short wave radiation lamps are the method of choice for a purely physical, chemical-free process of disinfection within residential, commercial and industrial applications. The Atlantic UV lamps are simple to install and require little supervision, maintenance or space.

Products:

Room & Air Duct Sanitizers, Water Purification, Liquid Disinfection, Waste Water Disinfection, Air & Surface Disinfection & Storage Tank Sanitizers

Applications:

Swimming Pools, Drinking water, Industrial Disinfection, Aquaculture, Waste Water Disinfection, Air & Surface Disinfection, Storage Tank Sanitizers

From: USA

DME has demonstrated their superb technical skills maintaining our UV systems while supplying us with filter media, the rapport and overall genuine dialogue demonstrates that they understand our needs and urgency in an industry and region that demands both!

-Wild Wadi Water Park

Specialists in:

Ozone generator

Overview

Veolia's Ozonia Ozone Systems are consistently ranked among the best in the industry for performance, quality and reliability. With research and development centers and manufacturing facilities on three continents, Veolia can deliver complete ozone systems to any customer specification. Trust the ozone technology leader with over 40 years of experience to help solve your water treatment challenges.

Products:

Ozone Generators

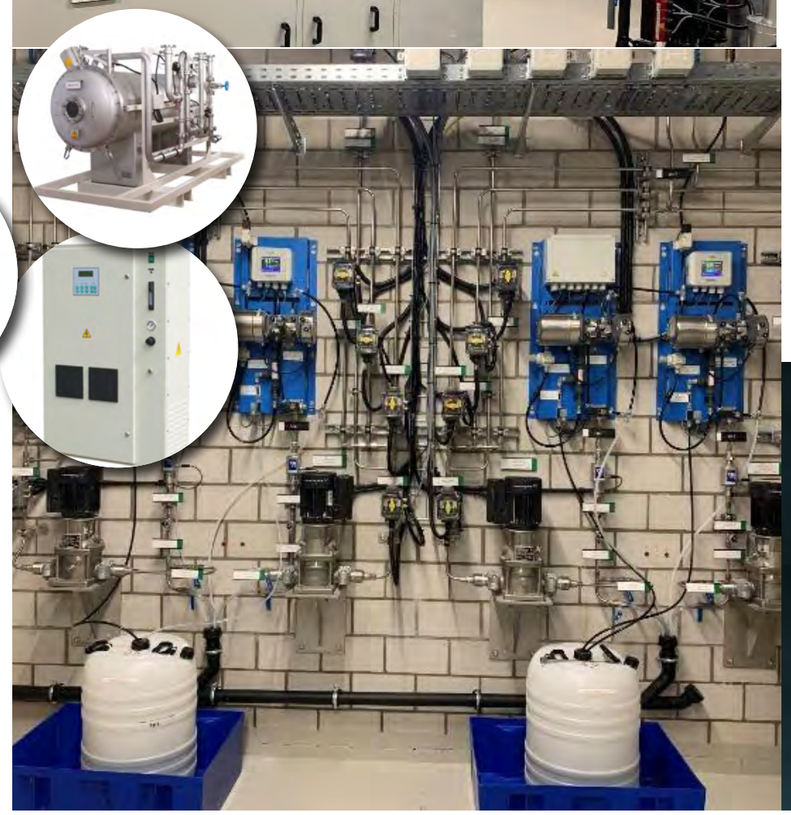

Applications:

Municipal drinking water treatment plants, Bottled water and beverage production, Cooling tower water treatment, Food processing industries

From: USA

Safety & Security

Overview

At Daly Middle East, our commitment to being a comprehensive solution provider goes hand in hand with our dedication to staying at the forefront of technological advancements. We understand that innovation drives progress, and we're proud to continually expand our product portfolio with the latest and most exciting offerings. This ensures that our customers benefit from state-of-the-art solutions that not only meet but often exceed their expectations.

Our unwavering commitment to quality is non-negotiable. Every product we offer undergoes rigorous testing and quality control processes to ensure it not only meets but also exceeds industry standards. We take into account the unique environmental conditions of the Middle East, ensuring that our products are built to withstand the challenges presented by the region's climate, making them durable and reliable even in harsh conditions.

Our strong belief in the power of partnerships has driven us to collaborate exclusively with manufacturers who embody the pinnacle of excellence in their respective sectors. When you choose Daly Middle East, you're choosing a solution backed by best-in-class technologies. Our strategic partnerships ensure that our customers receive products and services that represent long-term value for their investments.

As we continue to expand our product range and collaborate with industry-leading partners, you can trust Daly Middle East to be your trusted partner.

Thermal Imaging Cameras

Thermal imaging cameras detect infrared (IR) radiation emitted by objects and convert it into a visual image called a thermogram, where different temperatures appear as different colours or shades. Unlike standard cameras that capture visible light, thermal cameras "see" heat, making them useful in total darkness, through smoke, fog, or dust.

Specialists in:

Explosion Proof ATEX Air Conditioners & Digital Cameras

Overview

Ex-Machinery, a globally recognized manufacturer of explosion-proof and ATEX-certified air-conditioning systems. Ex-Machinery specializes in converting high-quality HVAC systems into explosion-safe air conditioners designed for operation in hazardous and potentially explosive environments. These systems are certified for use in Zone 2 / Zone 22 areas and are engineered to ensure safety, reliability, and long-term performance in demanding industrial conditions. failures.

Products:

ATEX Air Air Conditioners & Digital Cameras

Applications:

Oil and Gas, Petrochemical, Pharmaceutical, Mining, Aviation, Analyzer shelters, Control rooms, Battery room, Industrial containers, Crane cabins.

From: NETHERLAND

Specialists in:

Dropped Objects Prevention, Health and Safety

Overview

CableSafe® is part of Westmark Group, a specialized engineering company. Our company consists of a group of Engineers with 40+ years of hands-on operational experience in the Oil & Gas, Chemical, Construction and Power Generation industry. We manufacture most of our safety products ourselves in the EU and some in North America, guaranteeing reliability and quality. Westmark started in 1991 as a manufacturer of CableSafe Safety Hooks, our flagship product which became a standard in cable safety and cable management in different industries worldwide. We specialize in Cable Safety, Cable Management, Confined Space Safety and Dropped Objects Prevention.

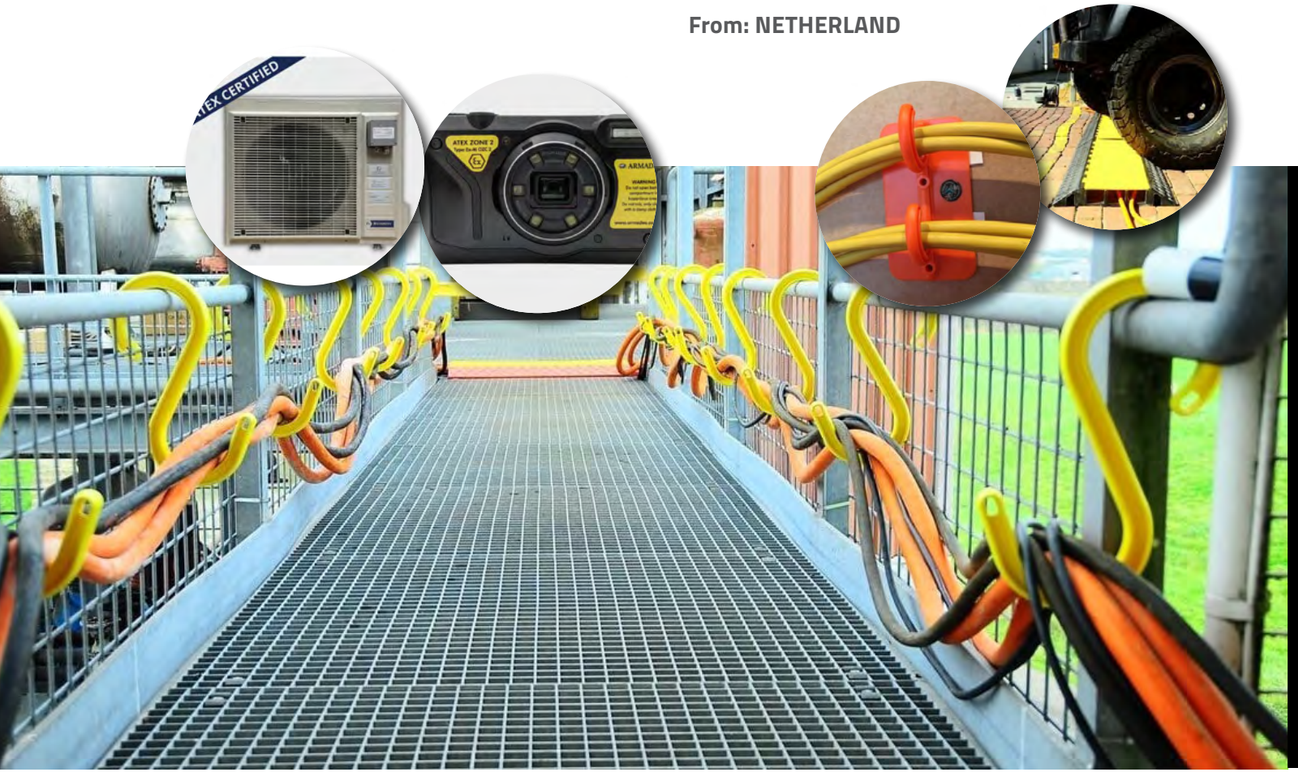

Products:

Safety hooks, Cable guards, rails, bridges, stands, Dropped Objects prevention mats and nets

Applications:

Construction, Electrical, Manufacturing, Marine and Offshore, Mining, O&G, Petrochemical and Warehousing

From: NETHERLAND

Specialists in:

Thermal Imaging Camera Solutions

Overview:

Seek Thermal was founded in 2012 by two pioneering scientists, Bill Parrish, PhD, and Tim Fitzgibbons, PhD, who together spent 40 years advancing military and professional-grade thermal imaging technology. After successfully building and selling two previous companies—Amber Engineering and Indigo Systems—Seek Thermal became their third venture, with a mission to make thermal imaging an integral part of everyday life.

Products:

Thermal Imaging Cameras

Applications:

Firefighting, Oil & Gas, Hunting & Outdoor

From: USA

Specialists in:

Axial Flow Fans

Overview:

Since its inception in 1986, Airtrade has prided itself on its client-centric philosophy, being sensitive to each clients' specific requests and meeting their needs. Airtrade serves the marine shipbuilding, repairs and offshore industries, industrial and commercial projects by providing ventilation and sound attenuation equipment and systems. We manufacture a wide spectrum of fan products, ranging from small domestic fans to large centrifugal / axial units for all applications.

Products:

Axial Flow Fans, Explosion Proof rated Bug Blower, Exhaust Fan

Applications:

Offshore & Onshore rigs, O & G, Ship Building

From: SINGAPORE

Specialists in:

Cocoon Pressurized Habitat

Overview:

Cairn Safety Technology, established in 2022, is driven by a singular goal: to enhance safety standards in some of the most challenging and high-risk environments. With a team that collectively brings over 50 years of expertise in hazardous area equipment and pressurized habitats, they are committed to developing solutions that safeguard both lives and valuable assets. Central to their offerings is the Cairn Cocoon Habitat, an innovative pressurized system designed for maximum ease of use, lightweight portability, and ergonomic functionality. Its cutting-edge safety features and globally recognized certifications make it a standout solution in the industry.

Products:

ATEX, UKEX and IECEx Certified Zone 1 Positive Pressure Welding Habitat

Applications:

Oil & Gas, Offshore, Onshore

From: UK

Specialists in:

Explosion Proof UPS, Battery and Photovoltaic Modules

Overview:

Excen S.r.l. is an Italian engineering company based in San Donato Milanese , built on a technical tradition dating back to 1948. Operating with a strict "zero compromise" safety philosophy , Excen specializes in explosion protection solutions for hazardous environments.The company converts standard industrial machinery, such as forklifts and cleaning machines, into ATEX and IECEx-compliant systems. They also design custom explosion-proof power infrastructure, including specialized diesel engines, offshore generator sets, backup UPS units, and solar panels. Excen supports global clients with specialized technical training, field maintenance, and a dedicated rental fleet.

Products:

Ex UPS, Ex solar panels, Ex battery boxes and Exd enclosures

Applications:

Offshore, Oil & Gas, Marine, Chemical, Petrochemical

From: ITALY

Service

Our dedicated service centre in Dubai provide unparalleled support service, maintenance and repair as standard to our customers.

Our experienced team has decades of real time support with our customers, whether that's on the phone, by email or in person. They work with our customers to ensure that your goals are the priority for any work we do with you.

We also offer bespoke solutions, some of which are listed below, providing full in-depth reports in accordance with regulatory authorities, together with 5-year plan options for upgrades:

- Commissioning
- Reverse Osmosis
- Lighting Survey
- Circle-H Survey
- Maintenance Contracts
- Critical Spares Recommendations
- ACCU and HVAC units

Contact to us to find out how we can support your team.

...the service team at DME are professional, friendly but above all knowledgeable. They know that repairs and maintenance, whether scheduled or emergency, impact your business and bottom line. We focus on getting the right solution that is reliable, cost effective and allows you to be more efficient...
